# **STOP** disease-related malnutrition and diseases due to malnutrition!

11 – 12 June 2009

## **FINAL DECLARATION**

Today, representatives of health ministries from the EU's Member States; the Czech Presidency of the EU; medical experts; health care officials; representatives of health insurance groups; ESPEN (the European Society for Clinical Nutrition and Metabolism); and ENHA (the European Nutrition for Health Alliance) reached the unanimous conclusion that malnutrition, including disease-related malnutrition, is an urgent public health and health care problem in Europe. Appropriate actions need to be taken to prevent malnutrition from continuing to compromise the quality of life of patients, to cause unnecessary morbidity and mortality and to undermine the effectiveness of our health care systems across Europe.

## **Vienna Declaration on Nutrition and Noncommunicable Diseases in the Context of Health 2020**

1. We, the Ministers of Health and representatives of the Member States of the World Health Organization in the European Region, together with the WHO Regional Director for Europe and health experts and representatives of civil society and intergovernmental organizations, have gathered in Vienna, Austria, on 4 and 5 July 2013 to face the challenges posed by the burden and threat of noncommunicable diseases (NCDs) and reaffirm our commitment to existing European and global frameworks to address important NCD risk factors, notably unhealthy diet and physical inactivity.
